Project Experience

Suggest Me a Movie - suggestmeamovie.cf - github.com/Islam888/suggestmeamovie April 2019

- Created a movie recommendation SPA that suggests a movie randomly. User can sign a movie as a favorite and the app will save all user's favorites.
- Provided data via The Movie database API.
- Technologies used: Reactjs, Material-ui, Bootstrap, React Router.

Analyze - trackin.tk - github.com/Islam888/analyze October 2018

- Created a charts' dashboard of pie, bar, and time series line charts with the ability to filter data through different dimensions via charts selection.
- Provided data via json file.
- Technologies used: Reactjs, Victory js, and Crossfilter.

insideViewport.js - github.com/Islam888/insideViewport.js September 2018

- Created an ultra light weight JavaScript library that detects if an element(s) is in viewport and call a function on it.
- Technologies used: Vanilla JavaScript.

My Reads - myreads.ml - github.com/Islam888/myReads July 2018

- Created a book tracking app that divide books into 3 categories (want to read, currently reading, and read).
- Provided a search option by author, or book title.
- Technologies used: Reactjs, HTML, and CSS.
